OMNISIGHT:
THE ULTIMATE VIEW

Total Visibility. Total Control. From Enterprise to Asset.

See Everything at Once.

Managing reliability across multiple locations shouldn't be a puzzle. Artesis OmniSight is the next-generation web platform designed to give you a holistic, "All-Seeing" perspective of your industrial fleet. Whether you are managing a single facility or a global enterprise, OmniSight centralizes your data into one intuitive, hierarchical interface.

HIERARCHICAL MANAGEMENT

Fleet → Region → Site

Fleet → Region → Site → Segment → Asset

The "General Manager" View

Stop switching between different screens. Artesis OmniSight is a top-down approach:

Multi-Site Management
View the health status of all your plants on a single map.

Segmented Organization
Drill down from the "Factory Level" to specific "Production Lines" (Segments).

Prioritized Action List
The system automatically sorts your assets by health status. See the "Red" (Critical) and "Yellow" (Warning) assets at the very top on your list instantly.

Why Managers Choose OmniSight:

Scalable:
Handles thousands of assets effortlessly.

Secure:
Industry-Standard Security Architecture & Multi-Level User Access

Accessible:
Cloud-based or On-Premise.
Access from anywhere, anytime.

Reporting & ROI
automatic reports, energy & avoidable loss views, export to PDF/Excel for audits.

Turn Complex Data into **Executive Clarity.**

OMNISIGHT

DEEP DIVE DIAGNOSTICS

Precision Insights: Health, Energy, and Performance.

See Everything at Once.

Artesis Insight™ Analysis
AI-Powered Diagnostic Intelligence

Advanced ESA Spectrum
View high-resolution electrical signatures to pinpoint loose bars, bearing faults, or misalignment.

Trend Analysis
Track the progression of faults over days, weeks, or months to plan maintenance at the perfect time.

ENERGY EFFICIENCY & COST ANALYSIS

Real-Time Efficiency
See the exact efficiency percentage of your motor-driven systems.

Cost of Waste
The system quantifies energy losses in Currency (£/$) and Carbon Emissions (CO2). Know exactly how much an inefficient motor is costing your bottom line.

Pump Performance Monitoring

Flow-Head Curve Visualization
See exactly where your pump is operating relative to its Best Efficiency Point (BEP).

Cavitation & Flow
Detect cavitation, low flow, or blockage instantly.
